

NOCELL™

Enforce your driver safety cell phone policy, protect your employees, company, and assets.

America, and the rest of the world, has a big problem that's rapidly growing – Distracted Driving. Specifically, distraction caused by cell phone use while driving. Nocell Technologies addresses the problem with an enterprise-grade solution – whether you have three vehicles or thousands in your fleet.

NOCELL driver device management DDM™ has three components. A **Mobile App** for your device(s), the online **Admin Portal** for your computer, and a **NOCELLtag™** for your vehicle.

- Fully customizable
- Easy to install – easy to configure – easy to use
- A dashboard for a quick look at the data, and reports for a deeper data dive

In Motion, NOCELL Automatically:

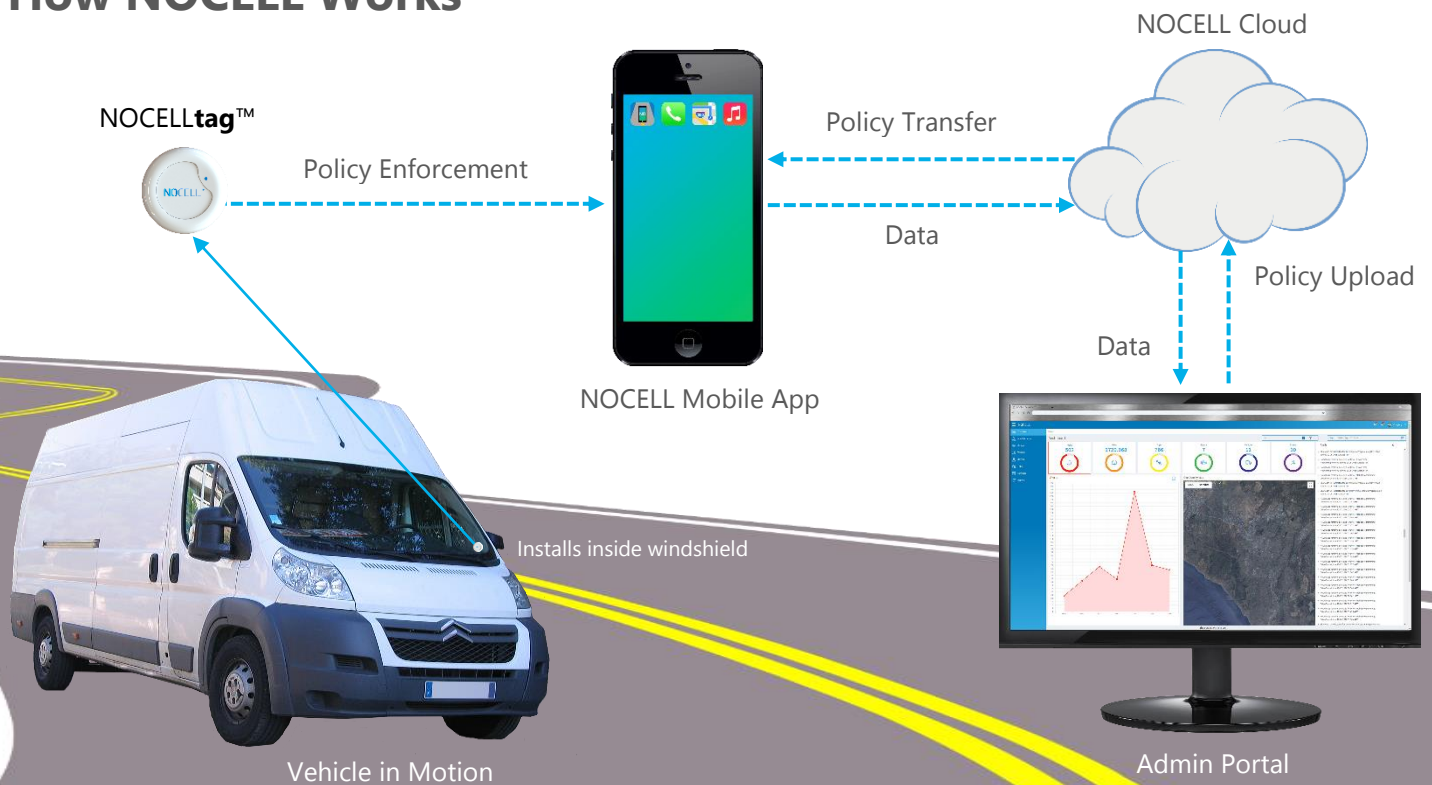

- Silences alerts
- Removes applications from the deck
- Queues text messages
- Routes calls to voicemail (option)
- Tracks driver location (option)
- Collects driver data

Additional Features:

- iOS & Android compatible
- Independent of OBDII port

No Distraction. No Worry. NOCELL™.

How NOCELL Works

1. Vehicle in Motion

NOCELL detects vehicle motion and automatically stops distractions on the driver's device(s).

2. Policy Enforcement

- Phone alerts silenced
- Apps removed from the deck
- Calls sent to voicemail (optional)
- Text messages queued

3. Alerts and Data Analytics

Administrator receives alerts and driver data. Full customization of the settings to ensure your driver safety policy is enforced.

Features That Matter Most

Driver Safety Policy Enforcement

NOCELL utilizes technology that enables application-level device-use policy enforcement and informs supervisors of non-compliance.

Distinct Enterprise-Grade Design

NOCELL driver device management DDM™ platform is designed from the ground up to easily integrate with existing telematics & fleet management systems.

Apple (iOS) & Android Device Compatible

Native mode apps that adhere to the design guidelines for each platform. Includes tablets and smartphones.

Privacy Mode Compliance

Administrators have the ability to schedule vehicle trip tracking. This ensures employee privacy during their non-working hours.

Full Customization

You can set your policy by company, groups, or individuals, allowing you to align with your company safety rules, and International, Federal & State laws.

Long Battery Life

Powered by industrial-grade Lithium batteries that have extended temperature ranges and low self-discharge rates.
